Changing the wax traps

1st remove the dome

Underneath you will find a white circular grommet this is the wax trap

Take a new wax trap from the pack. On the empty end of the applicator stick is a barbed protrusion. Press this into the wax trap you want to remove.

Remove the old wax trap.

Changing the Wax Traps	Latest review date: Jan-2025	Version number: 1.5
Status: Approved	Next review: Oct-2025	Page 2 of 4

Now flip the applicator around and press the new wax trap in to replace the old one.

Remove the applicator and the new wax trap will stay in place.

Finally replace the dome.

The wax traps should only be replaced if they are blocked.

Always make sure the dome is safely secured before you put the hearing aid into your ear.
